Congratulations to Andrea Ghiraldi - New Product Innovation Award for VISIOMIX - based on computer vision technology capable of measuring the homogeneity and length of fibers in the Feed Mixer during TMR mixing. VISIOMIX can be installed on every feed mixer & represents the cornerstone of a global project managing animal nutrition processes to achieve maximum production efficiency for farmers worldwide.

Controlling homogeneity and fiber length is paramount to rumination, sorting, production yield and animal health. Reduce feed variability & control feeding with positive results on health and productivity of your herd & increasing income.
